Assignment 1- **Node FileSystem CRUD**

1. Download the zip file, extract it and complete the template code.

2. Implement the functions in index.js file,
   Function definition is already given, with parameters.

   - `myFileWriter` will create a file with a given name and content.

   - `myFileReader` will read file with given name

   - `myFileUpdater` will update the file(not overwrite) with new content.

     Ex:- File.txt contains 'Hello', when we call
     `myFileUpdater('File.txt',' World')`
     Updated file content is "Hello World".

   - `myFileDeleter` deletes the file with the given name.

Submission steps:

Compress your folder in a zip file and submit it.
